Invest in the Momentum Factor Series funds and protect the real value of your money by participating in inflation plus targeted returns.

Momentum Global Investment Management introduces the Momentum Factor Series which include a range of risk rated funds designed to target returns over the medium to long-term that aim to beat the rate of inflation by 3%, 4% and 5% respectively. The funds were built to suit a range of investors with different investment objectives and time horizons, within a clearly managed risk framework.
